Using the MH3WV.org Website

The website consists mainly of videos and links to other, often primary, resources and websites.

It may be used: individually by students, for presentations by the teacher in the classroom, for homework assignments, or for home schooling. The website is **"responsive"**—it will automatically resize for use on PCs, tablets and even smartphones.

- The **Header** at the top of every page **includes the site search box, logo, tagline and menu of pages.**
- **Clicking on a page title loads that page.**
- **Each page has a table of contents of the topics on that page. Clicking on the topic scrolls/jumps down the page to that topic.**
- **Results from the site search box indicate which page(s) include your topic.** Once on the page, you may use **CRTL+F to search on that page.** (Search results may include ads from Google.)
- All **links open in a new Window/Tab.** (We **do not link** to any websites that are **commercial or political in nature,** nor to any that have an abundance of advertising, unless specifically noted as such.)

Videos:

Most videos **do not** require an **internet connection to YouTube (or Vimeo). Schools which have blocked YouTube ARE able to view these videos** on the MH3WV page -- **you will NOT see comments, related-video thumbnails, nor advertisements.** Videos can be viewed full-screen by clicking on the bottom right corner.

All videos and links on the MH3WV website **have been screened for appropriateness and language. But you are still urged to use due diligence and preview any videos and/or links you wish to use or assign.**

We make regular checks of links and videos, **but please let us know of any issues. Or Suggestions! Email: mh3wv.org@gmail.com**
